

ODU MEDI-SNAP® DISPOSABLE CONNECTOR

ODU MEDI-SNAP® Disposable connectors

are available with two different locking mechanisms - push-pull & breakaway. While closely aligned with the standard MEDI-SNAP portfolio, these connectors have been modified to meet the requirements of the disposable market.

The disposable plugs are designed for high-volume requirements where a single or limited use is foreseen. The corresponding receptacle, on the other hand, is designed for up to 5,000 mating cycles - a cost-effective quality solution.

Fields of applications are disposable endoscopes, disposable surgical ablation knives and other limited use devices.

- + Push-pull locking and break-away locking
- + Available in various contact configurations (14-, 7-, 4-pin layouts, others on request)
- + Intermateable with reusable receptacles with up to 5,000 mating cycles*
- + Mechanical coding on request
- + Customized cable assemblies as required
